INFANT AND CHILD CPR

Anyone caring for your baby should take a class in infant CPR—including you! Unintentional choking and suffocation are the leading causes of all injury deaths for infants under one year of age. Learn to recognize when a baby needs rescue breathing, how to start CPR, and how to care for an infant who's choking. Even if you've taken a course before, a refresher course provides current CPR instructions and information as recommendations change.

6:30 - 8:30 p.m. \$5 per person. Registration not required. Spanish interpreters available.
